INTESYS

Together – supporting
vulnerable children
through integrated
early childhood
services

In the Spotlight: *the state of ECEC integration in Europe*

MARCH 2017

IN THIS ISSUE

NEWSLETTER CONTENTS

If integrated work and close cooperation are so evidently positive, how did we end up with such segregated services in the first place?

INTESYS focuses on piloting new approaches to Early Childhood Education and Care (ECEC) systems in Europe with a view to ensuring that children and families in vulnerable situations have access to high-quality ECEC provided by services that are better integrated across the different sectors (education, health, welfare, etc.), professions and across age groups and governance levels. Download our **European Survey and Literature Review Report**.

In this newsletter you can find more about integrated ECEC services, the INTESYS Toolkit and our Baseline Evaluation Report.

The state of ECEC integration in Europe

ECEC integration in Belgium, Italy, Portugal and Slovenia - a summary

The Summary of Cross-Country Local Mapping Reports provides a cross-country overview of the context and main issues related to integration of ECEC services resulting from the local mapping in the four countries before the project pilot intervention started.

Download the Summary [here](#).

INTESYS Toolkit: Towards Integrated Early Childhood Education and Care Systems - Building the Foundations

The toolkit builds on the literature and survey report carried out in the project and provides a common ground for the four piloting countries in the project to work towards fostering the integration within ECEC system. The toolkit is meant to be an inspiring and versatile resource for the partners in supporting the activities in the pilots, while being responsive to specific country and local contexts.

Please be informed that this document is not the final version of the toolkit but a first draft that is used during the pilot phase and which will be adapted based on the experience made in the pilots.

Feel free to provide us with your feedback at: <mailto:mionescu@issa.nl>

Download the Toolkit [here](#).

Baseline evaluation report

The baseline evaluation report provides information on the level of integration of ECEC services in the specific locations where the project will operate, employing a methodology that collected data on structural (the state of art of integration in the pilot sites) and process aspects of integration (the dynamic of integration).
